

*The Impact of International Trade on Wages.* Edited by Robert C. Feenstra. University of Chicago Press, Chicago. (2000). 406 pages. \$62.00, £39.50.

Contents:

Acknowledgements. Introduction (Robert C. Feenstra). I. Shifts in labor demand. 1. And now for something completely different: An alternative model of trade, education, and inequality (Paul Krugman); Comment (James E. Rauch and Magnus Lofstrom). 2. Effort and wages: A new look at the interindustry wage differentials (Edward E. Leamer and Christopher F. Thornberg); Comment (Alan V. Deardorff). 3. Offshore assembly from the United States: Production characteristics of the 9802 program (Robert C. Feenstra, Gordon H. Hanson and Deborah L. Swenson); Comment (James A. Levinsohn). II. The role of product prices. 4. What are the results of product-price studies and what can we learn from their differences? (Matthew J. Slaughter); Comment (Robert E. Baldwin). 5. International trade and American wages in general equilibrium, 1967–1995 (James Harrigan); Comment (Jonathan Eaton). 6. Does a kick in the pants get you going or does it just hurt? The impact of international competition on technological change in U.S. manufacturing (Robert Z. Lawrence); Comment (Alan B. Krueger). III. Variation in wages across states and industries. 7. Understanding increasing and decreasing wage inequality (Andrew B. Bernard and J. Bradford Jensen); Comment (Lee G. Branstetter). 8. Exchange rates and local labor markets (Linda Goldberg and Joseph Tracy); Comment (Andrew K. Rose). 9. Trade flows and wage premiums: Does who or what matter? (Mary E. Lovely and J. David Richardson); Comment (George J. Borjas). 10. Trade and job loss in U.S. manufacturing, 1979–1994 (Lori G. Kletzer); Comment (Lisa M. Lynch). Contributors. Author index. Subject index.

*Issues in the Economics of Immigration.* Edited by George J. Borjas. University of Chicago Press, Chicago. (2000). 399 pages. \$55.00, £38.50.

Contents:

Acknowledgements. Introduction (George J. Borjas). 1. The economic progress of immigrants (George J. Borjas). 2. The educational attainment of immigrants: Trends and implications (Julian R. Betts and Magnus Lofstrom). 3. Diversity and immigration (Edward P. Lazear). 4. Convergence in employment rates of immigrants (Edward Funkhouser). 5. The changing skill of new immigrants to the United States: Recent trends and their determinants (Guillermina Jasso, Mark R. Rosenzweig and James P. Smith). 6. The more things change: Immigrants and the children of immigrants in the 1940s, the 1970s, and the 1990s (David Card, John DiNardo and Eugena Estes). 7. Do children of immigrants make differential use of public health insurance? (Janet Currie). 8. Social security benefits of immigrants and U.S. born (Alan L. Gustman and Thomas L. Steinmeier). 9. The role of deportation in the incarceration of immigrants (Kristin F. Butcher and Anne Morrison Piehl). Contributors. Author index. Subject index.

*Mergers and Productivity.* Edited by Steven N. Kaplan. University of Chicago Press, Chicago. (2000). 337 pages. \$40.00, £28.00.

Contents:

Acknowledgements. Introduction (Steven N. Kaplan). 1. Consolidation in the medical care marketplace: A case study from Massachusetts (Jason R. Barro and David M. Cutler); Comment (Paul M. Healy); Comment (Frank R. Lichtenberg). 2. The eclipse of the U.S. tire industry (Raghuram Rajan, Paolo Volpin and Luigi Zingales); Comment (Robert H. Porter). 3. Is the bank merger wave of the 1990s efficient? Lessons from nine case studies (Charles W. Calomiris and Jason Karceski); Comment (Christopher James); Comment (Anil K. Kashyap). 4. A clinical exploration of value creation and destruction in acquisitions: Organizational design, incentives, and internal capital markets (Steven N. Kaplan, Mark L. Mitchell and Karen H. Wruck); Comment (G. William Schwert); Comment (René M. Stulz). 5. Workforce integration and the dissipation of value in mergers: The case of USAir's acquisition of Piedmont Aviation (Stacey R. Kole and Kenneth Lehn); Comment (Severin Borenstein); Comment (Marc Knez). 6. Paths to creating value in pharmaceutical mergers (David J. Ravenscraft and William F. Long); Comment (Robert Gertner). Contributors. Name index. Subject index.

*Computer Architecture: Complexity and Correctness.* By Silvia M. Mueller and Wolfgang J. Paul. Springer, Berlin. (2000). 553 pages. \$54.95, DM 98.00, öS 716.00, sFr 89.50, GBP 34.00.

Contents:

Preface. 1. Introduction. 2. Basics. 3. A sequential DLX design. 4. Basic pipelining. 5. Interrupt handling. 6. Memory system design. 7. IEEE floating point standard and theory of rounding. 8. Floating point algorithms and data paths. 9. Pipelined DLX machine with floating point core. A. DLX instruction set architecture. B. Specification of the FDLX design. Bibliography. Index.

*Natural Language Processing and Knowledge Representation: Language for Knowledge and Knowledge for Language.* Edited by Lucja M. Iwańska and Stuart C. Shapiro. AAAI Press/The MIT Press, Menlo Park, CA. (2000). 459 pages. \$40.00.

Contents:

Preface (Lucja M. Iwańska and Stuart C. Shapiro). Contributors. I. Formal, computational, representations and inference methods based on natural language. Section introduction (Lucja M. Iwańska and Stuart C. Shapiro).
